RESISTANT

KEY FEATURES

HEAVY-DUTY IMPACT PROTECTION

Equipped with an impact-resistant toe cap to shield against dropped objects and heavy compression.

SUPERIOR SLIP RESISTANCE

The specialized PVC sole pattern offers exceptional grip on wet, oily, and uneven surfaces.

OIL & CHEMICAL RESISTANT

Highly resistant to mild acids, alkalis, oils and various chemicals.

BREATHABLE COMFORT

Breathable lining and cushioned insole keep your feet cool, comfortable and fatigue-free during long shifts.

ALL-WEATHER PERFORMANCE

Lightweight yet tough, engineered to withstand diverse environmental conditions.

TECHNICAL SPECIFICATIONS

FEATURE	ELITE PLUS
Model	Elite Plus
Type	High Ankle
Upper Material	Premium High-Density Synthetic Fabric
Sole Material	Direct-Injected Polyvinyl Chloride (PVC)
Toe Protection	Steel Toe Cap / Composite Toe Cap (Impact resistance up to 100 Joules)
Insole	Anti-static, cushioned EVA foam with moisture-wicking fabric
Lining	Breathable, abrasion-resistant mesh
Safety Standard Compliance	IS15298 Part-3:2024
Oil & Chemical Resistance	Highly resistant to mild acids, alkalis, and oils
Closure Type	Secure Lace-up system with reinforced eyelets
Available Sizes	5 - 11

SOLE TECHNOLOGY

PVC INJECTION SOLE

- Deep and wide tread pattern provides maximum grip and stability on various surfaces.
- Specially designed grooves channel out water, oil and debris to prevent slips and falls.
- High abrasion resistance ensures longer sole life even in rough working conditions.
- Oil & chemical resistant outsole for enhanced durability and workplace safety.
- Lightweight and flexible for better comfort and reduced foot fatigue.
